Mini Zoomer

PROJECT SPECS

PRODUCT DESCRIPTION

Mini Zoomer is a smaller-sized, younger companion to Zoomer! While she does not move around like Zoomer, she shows off her personality through her eyes and barks. Play with her to keep her happy. Neglect her and she'll start to get bored and sad. Watch out! She'll let you know if she's annoyed. Just like Zoomer, you can watch and make her perform tricks. You can see her dreams before she falls asleep or comfort her if she has nightmares. You can play games and make music with Mini Zoomer or even have fun playing games with her and all your friends. Mini Zoomer responds to Zoomer and other Mini Zoomers. Put several Mini Zoomers in a room together and they might just start singing to each other!

Mini Zoomer will have a few different versions with unique personalities to be sold exclusively in retail stores. There will be a main Mini Zoomer and a few exclusive versions. Unique personalities will be portrayed through new voice files and eye animations. The versions may also have different games and/or tricks.

HARDWARE

Battery: TBD

Chip: GPCD3270A

Speaker: TBD

Inputs:

- Nose push button
- Capacitive head button - detects upward head pet, downward head pet, and head pat
- Chest photo sensors – detects within a 12-14" range, can differentiate between different distances
- IR receiver – from Zoomer or another Mini Zoomer
- Back push button

Outputs:

- 2 eye LED matrices (5x7)
- Speaker
- IR transmitter – to another Mini Zoomer

Try-Me Mode

TBD

Table Tennis

Notes for programming:

In Big Zoomer, the speed of the ball in Ping Pong increases linearly indefinitely.

For Mini Zoomer, the speed of the ball should increase, non-linearly, but according to the table, and cap at a maximum speed. The maximum speed should be very very difficult, but not impossible.

# of Hits	Speed of Ball
1-3	2
4-10	2.3
11-15	2.7
16-25	3.3
26-40	4.4
41-60	5.7
61-80	8.3
81+	15
